1. **The output of the following fraction of code is**

```
public class Test{
        public static void main(String args[]){
                String s1 = new String("Hello");
                String s2 = new String("Hellow");
                System.out.println(s1 = s2);
        }
}
```

A. Hello

B. Hellow ✔

C. Compilation error

D. Throws an exception

E. None of these

Answer & Solution | Discuss in Board | Save for Later

2. **What will be the output of the following program code?**

```
class LogicalCompare{
        public static void main(String args[]){
                String str1 = new String("OKAY");
                String str2 = new String(str1);
                System.out.println(str1 == str2);
        }
}
```

A. ○ **true**

B. ○ **false**

C. ○ **0**

D. ○ **1**

E. ○ **Displays error message**

Answer & Solution | Discuss in Board | Save for Later

3. **What will be the output of the following program?**

```
public class Test{
        public static void main(String args[]){
                String s1 = "java";
                String s2 = "java";
                System.out.println(s1.equals(s2));
                System.out.println(s1 == s2);
        }
}
```

A. false true

B. false false

C. true false

D. **true true** ✔

Answer & Solution | Discuss in Board | Save for Later

4. **Determine output:**

```
public class Test{
        public static void main(String args[]){
                String s1 = "SITHA";
                String s2 = "RAMA";
                System.out.println(s1.charAt(0) > s2.cha
rAt(0));
        }
}
```

A. ◉ **true** ✔

B. ○ false

C. ○ 0

D. ○ Compilation error

E. ○ Throws Exception

Answer & Solution | Discuss in Board | Save for Later

5. **What could be output of the following fragment of code?**

```
public class Test{
        public static void main(String args[]){
                String x = "hellow";
                int y = 9;
                System.out.println(x += y);
        }
}
```

A. Throws an exception as string and int are not compatible for addition

B. **hellow9** ✔

C. 9hellow

D. Compilation error

E. None of these

Answer & Solution | Discuss in Board | Save for Later

6. toString() method is defined in

A. ○ java.lang.String

B. ◉ java.lang.Object ✔

C. ○ java.lang.util

D. ○ None of these

Answer & Solution | Discuss in Board | Save for Later

7. **The String method compareTo() returns**

A. true

B. false

C. an int value ✔

D. 1

E. -1

Answer & Solution | Discuss in Board | Save for Later

8. **What will be the output?**

```
String str1 = "abcde";
System.out.println(str1.substring(1, 3));
```

A. abc ✗

B. bc ✓

C. bcd

D. abcd

E. None of these

Answer & Solution | Discuss in Board | Save for Later

9. **What is the output of the following println statement?**

```
String str1 = "Hellow";
System.out.println(str1.indexOf('t'));
```

A. true

B. false

C. 1

D. -1 ✔

E. 0

Answer & Solution | Discuss in Board | Save for Later

10. What will be the output of the following program?

```
public class Test{
        public static void main(String args[]){
                String str1 = "one";
                String str2 = "two";
                System.out.println(str1.concat(str2));
        }
}
```

A. one

B. two

C. onetwo ✔

D. twoone

E. None of these

11.

```
String str1 = "Kolkata".replace('k', 'a');
```

In the above statement, the effect on string Kolkata is

A. The first occurrence of k is replaced by a.

B. **All characters k are replaced by a.** ✔

C. All characters a are replaced by k.

D. Displays error message

Answer & Solution | Discuss in Board | Save for Later

12. The class string belongs to ..... package.

A. ○ java.awt

B. ◉ java.lang ✔

C. ○ java.applet

D. ○ java.string

Answer & Solution | Discuss in Board | Save for Later

13. What will be the output?

```
public class Test{
        public static void main (String[] args){
                String test = "a1b2c3";
                String[] tokens = test.split("\\d");
                for(String s: tokens)
                        System.out.print(s);
        }
}
```

A. abc ✔

B. 123

C. Runtime exception thrown

D. Compilation error

Answer & Solution | Discuss in Board | Save for Later

14. How many objects will be created?

```
String a = new String("Examveda");
String b = new String("Examveda");
String c = "Examveda";
String d = "Examveda";
```

A. 4

B. 3 ✓

C. 2

D. None of this

Answer & Solution | Discuss in Board | Save for Later

15. How many Constructor String class have?

A. 2

B. 7

C. 13 ✔

D. 11

E. None of this

Answer & Solution | Discuss in Board | Save for Later

16. What will be output?

```
String S1 = "S1 ="+ "123"+"456";
String S2 = "S2 ="+(123+456);
```

A. ◉ S1=123456, S2=579 ✔

B. ○ S1=123456,S2=123456

C. ○ S1=579,S2=579

D. ○ None of This

Answer & Solution | Discuss in Board | Save for Later

17. What will be the output of the following program code?

```
public class Test{
      public static void main(String args[]){
            String s = "what";
            StringBuffer sb = new StringBuffer("what");
            System.out.print(sb.equals(s)+","+s.equals(s
b));
      }
}
```

A. true,true

B. false,true

C. true,false

D. false,false ✔

E. None of these

Answer & Solution | Discuss in Board | Save for Later

18. What will be the output?

```
1. public class Test{
2.      public static void main(String args[]){
3.            Object myObj = new String[]{"one", "two",
"three"};
4.            {
5.                for(String s : (String[])myObj)
6.                      System.out.print(s + ".");
7.          }
8.      }
9. }
```

A. ◉ one.two.three. ✔

B. ○ Compilation fails because of an error at line 3

C. ○ Compilation fails because of an error at line 5

D. ○ An exception is thrown at runtime.

E. ○ None of these

19. Determine output:

```
public class Test{
      public static void main(String args[]){
            String str = null;
            if(str.length() == 0){
                  System.out.print("1");
            }
            else if(str == null){
                  System.out.print("2");
            }
            else{
                  System.out.print("3");
            }
      }
}
```

A. ○ Compilation fails.

B. ○ "1" is printed.

C. ○ "2" is printed.

D. ○ "3" is printed.

E. ◉ An exception is thr
